

## **Jason Bach**

**Business Executive & Entrepreneur**  
**Mosaic Data Services, Inc.**

**[jbach@mosaicdataservices.com](mailto:jbach@mosaicdataservices.com)**

Innovative thinker and successful technology entrepreneur, Jason Bach has been working as both an Executive and Entrepreneur for more than 25 years. Jason has literally been in the trenches working “hands-on” to build and expand the availability, usefulness and acceptance of the Internet and many of the technologies which have evolved from it since the late 1990s.

Jason Bach is the Founder, President & CEO of Mosaic Data Services, Inc. a nearly 20-year old Cloud-Based Internet Solutions & Hosting company founded in 2000 and based in Washington DC. Mosaic provides a wide range of web hosting, software-as-a-service (SaaS), infrastructure-as-a-service (IaaS), server colocation and datacenter management solutions to thousands of customers throughout the Mid-Atlantic region and across the country.

Jason is a Co-Founder and Partner of Mid-Atlantic Technology Partners, LLC, a technology consortium established to identify and engage with emerging and innovative technology solutions providers with a focus on bringing new, exciting and exceptional technologies to market.

Jason serves as the CEO of HyperScale Hosting, Inc. which was recently founded to provide revolutionary new high efficiency and high density datacenter solutions to a currently inefficient mainstream datacenter sector. HyperScale will initially focus on providing high density datacenter solutions to a burgeoning cryptocurrency sector, however this model will quickly expand to include other emerging and demanding technologies such as artificial intelligence (AI), virtual reality (VR), self-driving vehicles and many other extreme technology sectors with high density computational requirements.

Jason serves on the Montgomery College Advisory Board for Informational Technologies, whose purpose it is to advise the Professors and Educational Partners on curriculum, changes in industry trends and to help create partnerships that benefit the students of Montgomery College. Jason has been working closely with Montgomery College for more than 10 years and has placed dozens of students into successful technology careers in the both commercial and government sectors.

Jason served on the Board of Directors for the Academy of Information Technology (AOIT) program which empowers high school students who aspire to have careers in Cybersecurity and Information Technology with the training and guidance required to enter the IT workplace.

Jason is a graduate of the University of Maryland with a BS degree in Business Administration. Jason is an avid soccer player, sports enthusiast and Washington Capitals season ticket holder. He has been married to his wife (Karol) for 18 years, has two daughters (Kristina and Cassidy) and currently resides in Gaithersburg, MD.
